

Vincent VIGUIÉ

French Nationality, Date of birth: 01/01/1983

[Updated: March 16, 2017]

email: viguie@centre-cired.fr

webpage: <http://www.centre-cired.fr/spip.php?article842>

Centre International de Recherche sur l'Environnement et le Développement (CIRED)

45bis, Av de la Belle Gabrielle (Site du Jardin Tropical)

F-94736 Nogent-sur-Marne, France

Tel: (33) 1 43 94 73 64

Research Interests

Climate change adaptation economics: Evaluation of climate policies, Climate change impacts and vulnerabilities, natural disasters indirect economic impacts

Sustainable city development: Climate Policy implications on/from urban areas, Synergies and conflicts between urban climate policies and other urban policies

Modelling and methodologies: Modelling of coupled human/natural/engineering systems, Urban structure dynamics, future studies and long-term scenarios

Professional Experience

Since 2012	International Research Center on Environment and Development (CIRED) Research scientist	Paris, France
Since 2006	French Ministry of Ecology, Energy and Sustainable Development (MEEDDE) Executive top civil servant, at the Corps des Ponts et Chaussées	Paris, France
2008-2012	International Research Center on Environment and Development (CIRED) PhD candidate	Paris, France
Oct 2007-Sep 2008	The World Bank – Africa Transport Unit Analyst	Washington, USA West Africa

Education

2008-2011	International Research Center on Environment and Development (CIRED) PhD in Economics " <i>Urban dynamics modelling: towards an application for the economic assessment of climate change</i> " - Directors: Stéphane HALLEGATTE and Jean-Charles HOURCADE	Paris, France
2006-2008	Ecole Nationale des Ponts et Chaussées, Paritech - Master of engineering Major: Economics and finance Minor: Urbanism, Transport and environment	Paris, France
2002-2006	Studies in Physics at the Ecole Normale Supérieure, Lyon one of the best French selective "grande école" Degrees: <ul style="list-style-type: none">• Master of Science in Theoretical Physics in 2006, cum Laude• Physics « Agrégation » (prestigious competitive teaching examination) in 2005• Erasmus exchange student at Imperial College, London in 2004	Lyon, France London, UK

In Cities and adapting to climate change. ONERC Report to the French Prime Minister and Parliament.)

Projects

- Management** Head of the sustainable urban development team in CIRED (3 engineers, 2 PhD students, 2 part-time post-docs).
Co-Coordinator of the VURCA (urban vulnerability to heat waves) ANR project (3 years, 3 institutes)
Coordinator of CIRED's participation to MUSCADE (ANR), Acclimat (RTRA-STAE), DRAGON (ANR) and VITE (ANR) research projects, and CIRED's participation to French National Observatory on Climate Change Impacts (ONERC) annual report to the French Prime Minister and Parliament.
Participation to Basile Pfeiffer, Joël Hamman, Paolo Avner and Manon Solignac PhD supervision.
Organizer of the interdisciplinary "climate change adaptation" working group in the labex Futurs Urbains (a French multi-university institute about sustainable urban development), and of CIRED's participation to UCCRN.
- Expertise** Participation in the organization of the French National adaptation plan
Consulting for WWF, Negawatt network, GRET ...
Contributed to the drafting of FFEM (French Global Environment Facility) adaptation financing strategy
Participation in the study of climate change impacts and adaptation options for the South East of France (coordinated by Provence-Alpes-Côte d'Azur prefecture), for Seine Saint Denis Department, and for Wallonie Region in Belgium.
Collaboration and expertise about sustainable city development or climate change adaptation with World Bank, OECD, European Environment Agency, French Global Environment Facility (FFEM), CDC climat, French Ministry of sustainable development, ONERC (French government's observatory for climate change impacts and adaptation), Paris city administration, Ile de France Urbanism Institute (IAU), Grand Lyon urbanism institute (UrbaLyon), Toulouse Urbanism Institute (AUAT), Ademe (French agency for Energy and environment), Allianz, Centre Interprofessionnel du Vin de Bordeaux, French Ministry of sustainable development ...
- Teaching** Courses on climate change adaptation and sustainable city development – master level – engineering schools : Ecole Nationale de la Météorologie, AgroParisTech, Ponts ParisTech, ENSTA, Ecole Supérieure de Commerce de Toulouse
- Outreach** Interviews and outreach texts in journals and newspapers (AFP, Terra Eco, France 3, Economie matin, UGEC viewpoints, La jaune et la rouge, La Météorologie)
- Prize** PhD Student Paper Prize (2nd ex-aequo) in energy economics, French Association for Energy Economics (December, 12th 2011)

Vulgarization/Communication with decision-makers

Participation to the train of climate, which travelled across France before COP21 with researchers on board to inform people about climate change issues.

Conferences at OECD (latest: February 2017), World Bank (latest: November 2014), AFD (latest: October 2015), French ministry of environment (latest: September 2016)

Conferences for local authorities (latest: Agence d'urbanisme de l'agglomération orléanaise, and Assises départementales Haute-Garonne, November 2015)

Organisation of a Side Event at the COP21 (French Pavillion) "sustainable urban mobility", December 2015

Societal and Economic Impacts of Sea Level Rise, Collège de France, symposium on Climate change and sea level rise ; coastal vulnerability and societal impacts, June 2013.

Invited speaker and chairman *Sustainable transport in cities*, Débat national sur la transition énergétique, région île de France, Paris, April 2013

Roundtable "*Adaptation au changement climatique*" (Climate change adaptation). In 11ème journée technique du Centre Interprofessionnel du Vin de Bordeaux. Bordeaux, France, February 2013.

Changement climatique, mieux connaître pour mieux prévenir, Allianz Inc. internal seminar, November 2012

Research projects

VURCA research project studies **Paris urban area** vulnerability to future heat-waves, in order to provide first insights on the complex interaction between city economies and climate change and on the viability and effectiveness of identified adaptation options.

MUSCADE project focuses on three items involved into **Paris urban area** sustainable development: energy, city structure, and climate change, closely linked to each other's, at both global and local scales. This project is intended to open new interdisciplinary research areas on sustainable cities and to increase urban planners awareness on energy issues within the city, given the climate change. By identifying leverages, the framework could also help future decisions concerning buildings, local energy production, and urban regulations.

ACCLIMAT research project aims to study urban development, urban micro-climate, and climate change process interactions in **Toulouse**. A numerical modelling framework will be developed to couple physical models and socio-economics urban models, which will be driven by local climate change and socio-economic scenarios, including macro-economics, land-use, building materials, technologic and transportation assumptions.

DRAGON aims to develop robust evidence on the scope for, the routes to and the potential limits of green growth strategies in both EU and Chinese cities, and to draw lessons and promote learning to facilitate a transition towards low carbon development in EU and Chinese cities

VITE aims to bring a prospective approach to social, environmental, and territorial effects of urban energy transition strategies. Taking Paris urban area as a case study, the project will examine existing scenarios developed during regional strategic planning and will explore direct and indirect effects of proposed strategies in terms of resource, energy, pollution and pollution fluxes.

European COST Action TU0902, Integrated assessment technologies to support the sustainable development of urban areas.

Other information

Language skills **French:** Mother tongue
English: Fluent
German: Conversant
Spanish: Basic Level

Computer knowledge **Programming:** Python, C, C++, FORTRAN
Scientific calculus: Scilab, Matlab, Maple, Mathematica,
GIS: QGIS, Grass
Linux, Windows, LaTeX, MS Office

Sports and Hobbies **Sport:** Skydiving, kitesurfing, sailing, diving, French boxing, rock climbing
I have been volunteering for four years in the social support and the first responder services of the **French Red Cross**, and am member of the executive board of one of its Paris district division
